# EUROPEAN LANGUAGE DATA SPACE

## Common European Language Data Space / Spás Sonraí Teanga Eorpach
## The LDS Workshop in Ireland / An Cheardlann LDS in Éirinn
## Conclusions / Críoch

Dr. Brian Davis (ADAPT Centre, DCU)
brian.davis@adaptcentre.ie

10-10-2024 LDS Country Workshop, Dublin, Ireland
https://language-data-space.ec.europa.eu

# Topics Raised

- Language Technologies (LT) and Artificial Intelligence (AI) need language data
- Large Language Models (LLMs) need vast amounts of language data to train them
  - Domain-specific data is arguably the most important
- The value of language data: embracing the opportunity to monetise our data and promote policies that will see Ireland as an active member of the European Data Market
- LDS useful for stakeholders across all sectors: industry, research and public administrations

# Lessons Learnt

- The benefits of sharing and commercializing data are twofold:
  - Data providers capitalize on their assets
  - LT developers and suppliers, as well researchers and public administrations, benefit from data availability

- Current policies beginning to address many of the issues present, but pressure to keep up with the demand of the market

- Ongoing European and Irish initiatives provide opportunities to be at the forefront of language technology development

- The **Common European Language Data Space** offers a single market for data and services: let us use it!

EUROPEAN LANGUAGE DATA SPACE

**Your feedback matters: *Evaluation form***

**Do you need a *Certificate of attendance*?**
